

# ALL HEIGHT SAFETY SOLUTIONS

installation  
services

QBSA Act Licence No. 1173314

Did you know?  
A BSA license  
is required for  
this work  
in Queensland!

## Have you met your obligations for provision of a safe work environment?

Australian standards, codes or practice, Workplace Health & Safety Act, Regulations, Industry Codes, ISO Standards, it's a lot to know. Don't worry, we have got you covered!

At All Height Safety Solutions we understand that you can't be expected to know it all when it comes to Height safety compliance . . . that's why we are here. Besides, we won't even pretend to know everything about your business either, let us take this OH&S concern from you.

Under the Workplace Health & Safety Act it is up to the controller of the premise to ensure provision for a safe working environment is achieved through consultation. All Height Safety Solutions are experts in their field. Our experience comes from decades in the industrial rope access and height safety industry. The advantage of this is that we are end users of systems everyday, our lives depend on us getting it right.

In addition to our technicians training and competency in working safely at heights, industrial rope access and inspection, and manufacturer installer training, we have a dedicated compliance manager who is not only a qualified OHS practitioner but also accredited

for technical competence by NATA.

NATA accreditation provides a means of determining, recognizing and promoting the competence of facilities to perform specific types of testing and inspections. NATA accreditation is World recognized and is the highest level of accreditation for inspecting and testing practices. All inspection and installation works in QLD require BSA license, ensure you confirm this or you may end up with far less than what you paid for!

Whether you require anchor points, ladder access systems, confined space davits, walkways, or even consultation services, 'All Height Safety Solutions' have got you covered. Our speciality lies in assisting you in developing a complete system for all working at heights on your site, but if you already have things in place we will develop the maintenance program around any other compliant system. Our systems are innovative, efficient and transparent, and allow our clients authorized access to back-end viewing via our web portal for all certifications, reports, manuals and other correspondence matters.

Our compliance audits, are world class. The systems we employ allocate risks to identified hazards, then delegate and put reminders to

those accountable for required actions. All this goes a long way to meeting your obligations for OH&S.

**How often must our equipment be certified?**

In accordance with the National Code of Practice for the Prevention of Falls and the Workplace Health & Safety Regulation, permanently installed systems & Associated PPE must be inspected and certified not less than every 6 months by a Height Safety Inspector. We can track and monitor currency for all your systems, can assist you to establish registers of all your equipment.
