Quality
training - results
in quality
technicians!

Dynamic industry for dynamic people . . .
whether new to rope access or upgrading.

Thank you for your enquiry into our rope access training and facilities!

Whether you are new to this dynamic, rapid growth, exciting industry or have vast experience, we believe you will find the service, quality, integrity and expertise required to take you to that next level with All-Industrial Abseilers (AIA).

With vast experience in the Industrial Rope Access Industry and known for our high standards, AIA is the training provider for individuals and businesses seeking to gain relevant, highly professional skills in the field of height access and safety.

Our new training facility provides participants with the opportunity to learn and develop new skills within a fully equipped, custom built environment. Located at Upper Coomera, the centre is ideally situated for easy access from both Brisbane and the Gold Coast by either vehicle or train.

All courses are certified by the ARAA ensuring that all participants must display a high level of competency and knowledge to complete their training and pass assessment.

LEVEL 1

The Level 1 Access Technician provides a basic entry level qualification and has the skills to safely work within a variety of safety systems employed in Industrial Rope Access under the direct guidance of a Level 2 or Level 3 technician (Note: Working Safely at Heights (RIIOHS204A) or equivalent qualification is a prerequisite for this training course)

LEVEL 2

An intermediate qualification incorporating the skills required to safely employ and guide rope access activities for vertical only works in an urban environment, and to work in a supporting role to Level 3 technicians on complex work sites (Note: current Senior First Aid qualification and a minimum of 500 operational hours as a level 1 Access Technician is a prerequisite for this training course).

LEVEL 3

Advanced qualification that is required for a team leader where complex works such as traverses, lead climbing, work over water, confined spaces are required. Will have more experience in rescue planning and in documentation of works (Note: current Senior First Aid qualification and a minimum of 1000 operational hours as a level 2 Lead Access Technician is a prerequisite for this training course).
