height safety
 compliance
 free health check

As the controller of a premises you may have obligations under the Workplace Health & Safety Act regarding Height Safety. The question is . . . have you met them?

QBSA Act Licence No. 1173314

Take five minutes to let us help you determine the health of your height safety compliance.

If you don't know all about height safety, that's what we are for.

Answer the questions below and you will immediately have an answer on your businesses health concerning height safety on your premises.

They are simple yes and no questions. If you are unsure, it is better to answer 'no' than to assume compliance.

1. Are you aware of your obligations under the Workplace Health & Safety Regulation with regards to working at heights on your premise?

Yes or No

2. Does your site have a working safely at heights policy/procedure?

Yes or No

3. Has your height safety/ industrial rope access system been installed by a BSA licensed company?

Yes or No

4. Do your contractors hold the required tickets of competency for working safely at heights and/or industrial rope access on your site?

Yes or No

5. Is your height safety/ industrial rope access system currently certified within the last 6 months?

Yes or No

If you answered No to any of the answers above then your health is in question!

Our recommendation is that you contact our office and request the NATA Accredited height safety inspector provide an audit to determine your exact risk relative to Height Safety obligations under the

Workplace Health & Safety Regulations.

To arrange an audit please contact our office today on 1800 657 648 or email Lindsay at lindsay@accessmaintenance.com.au

Don't delay lives are depending on it!
